EASY HEAT REGULATION

KIT FOR WIRELESS CONTROL OF ELECTRIC HEATING

This kit enables convenient and quick control of heater, oil heater, panel heater or portable air conditioner. Just plug the device into controlled switching sockets and appropriately place your controller RFTC-50G. The desired temperature is set on the controller, that compares it with the current record and it sends a command to turn the device ON.

Order code: 5164

REMOTE HEATING

KIT TO CONTROL HEATING VIA YOUR SMARTPHONE

Includes 3 wireless thermovalves that are mouned to a radiator valves. It measures the room temperature and sends it to the Smart RF box that compares it with the temperature set along with the time schedule in the App in your smartphone; sends a command to open or close the valve. It is possible to turn on the heating circuit via App, whether you're at home, or just going to your cottage and don't want to come to unheated place.

Order code: 5162

WHY WIRELESS CONTROL?

SUITABLE FOR EXISTING BUILDING

QUICK AND EASY INSTALLATION WITHOUT ANY DEMANDING RECONSTRUCTION

SUITABLE FOR EXISTING ELECTRICAL INSTALLATIONS

CONTROL VIA YOUR SMARTPHONE

NEWS!

GAME OF LIGHTS

KIT FOR CONTROLLING LIGHTS VIA SMARTPHONE

It never been easier to set the appropriate ambience for reading a book, watching a movie or a party with friends. All you need is wireless bulbs and Smart RF box. Then you can control every device from the comfort of your Smartphone, tablet or smart TV. You can control not just colored or white light bulbs, but other appliances too.

Order code: 5159

HEATING WITH SAVINGS

WIRELESS KIT TO CONTROL HEATING VIA RF TOUCH UNIT

Includes 3 wireless thermovalves that are installed instead the standard radiator valves. Measures the room temperature and send it to the Wireless touch unit. Wireless touch unit compares it with the set temperature and sends a command to open or close the valve. In the wireless touch unit you can set heating programs (the weekly schedule), separately for each circuit (room).

Order code: 5161

KIT´S CONTENT

TEMPERATURE CONTROLLER

Wireless temperature controller is the easy solution to control temperature in the room or the whole house.

SWITCHING SOCKET

It is a quick solution for the wireless control of plugged-in devices. It connects between the existing socket and operated appliance.

KIT´S CONTENT

SMART RF BOX

The Smart RF box is the mediator between your controller (phone, tablet, Samsung Smart TV) and wireless devices controlling lights, heating, blinds, sockets and other appliances

WIRELESS THERMOVALVES

Wireless thermovalves measures the room temperature and sends it to the Smart RF box, which converts it into your iNELS Home Control app.

KIT´S CONTENT

SMART RF BOX

The Smart RF box is the mediator between your controller (phone, tablet, Samsung Smart TV) and wireless units controlling lights, heating, blinds, sockets and other appliances.

WIRELESS RGB BULBS

These LED bulbs contains three color chip (RGB), which can mix up any color (including white) at different temperatures.

KIT´S CONTENT

WIRELESS TOUCH UNITS

The unit offers complete control over heating, switching appliances and devices, lights, blind control or gateway.

WIRELESS THERMOVALVES

Wireless thermovalves measures the room temperature and sends it to the Smart RF box, which converts it into your iNELS Home Control app.

LARA & MUSIC IN THE SWITCH

KIT FOR CONTROLLING MUSIC, WHICH PERFECTLY FITS IN YOUR HOME´S INTERIOR

LARA is a music and internet radio player. We have registered 40 favorite radios stations as presets stations, but you can easily change it using configurator. LARA plays the music stored in the NASA storage or in the external source (phone, MP3 player) connected through cable on the front panel of device. Inbuilt amplifier 10 W allows direct connection of speakers (in the same LOGUS 90 design) or allows connection of external in-wall or ceiling speakers.

Order code: 5160

# ONE CONTROLLER FOR ALL

KIT FOR CONTROLLING VIA A SMARTPHONE

Using your Smartphone as a remote controller? Thanks to Smart IR box, you can control home appliances via a Smartphone. Thus you no longer need a bunch of controllers, you do not have to look for them, and you do not need to replace the battery. You always stick your phone in your pocket, always at hand. Moreover, you can control devices which are placed in another

room (e.g. you can turn off TV in the children room).

VIRTUAL KITS

UNDERFLOOR HEATING - BY WATER

Any wireless temperature regulator measures the room temperature, it compares with set temperature and time program, then sends a command to switch the units ONE. Based on the command from temperature regulator, 6-channels switching unit is able to control up to 6 thermo-valves corresponding to heating circuits.

UNDERFLOOR HEATING - BY ELECTRICITY

Temperature and switching unit (two in one) measures the floor temperature via external sensor (inbuild). Then it sends data to wireless touch unit RF Touch, which compares it with the temperature set along with the time schedule and then sends a command back to switch on/switch off the heating circuits. It is possible to connect up to 4 temperature/switching units.

AGAINST THE FLOOD

A wireless sensor monitors the water leaks or flooding in the critical places (basement, pits, shafts, bathroom, laundry,...) and sends immediately a command to the switching unit to close the solenoid valve of the main water supply. You can be also informed of that accident through GSM gateway by sending SMS text messages.

COLORED RGB LED STRIP

The app in your smartphone can send (through Smart RF box) the commands to the dimming unit to which the RGB strip is connected. From your app it is possible to switch ON/OFF, to set the color or run the scene of automatic color blending.

KIT´S CONTENT

LARA RADIO

LARA is a music and internet radio player. We have registered 40 favorite radios stations, but you can easily change it using configurator. LARA plays the music stored in the NASA storage or in the external source (phone, MP3 player).

SPEAKER

Speaker for mounting into an installation box in the design of switches Logus90. Output power 10W 32ohm impedance, size ² „. Covers are not included in the package.

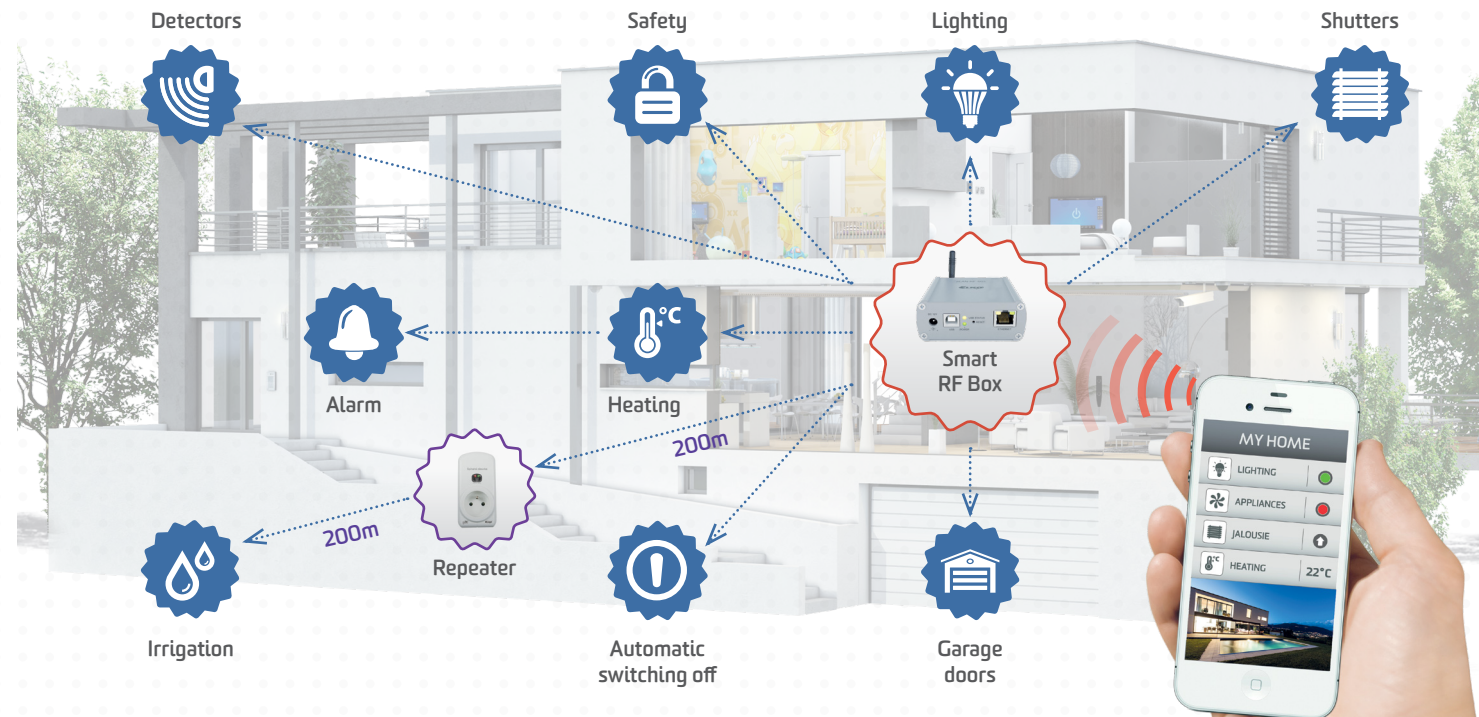

KIT´S CONTENT

SMART IR BOX

It is the mediator between a Smartphone and controlled appliances. Learned commands from existing controllers are assigned to the corresponding buttons in app.

iR TRANSMITTER

It sends a command to the controlled devices using IR signal.

KIT´S CONTENT (Smart House)

Wireless wall controller 2 independet push-buttons	Dimming socket	Switching socket	Wireless temperature controller
Wireless control unit RF touch	Wireless RGB bulbs	Wireless switch units 1 output	Switch unit with a temperature sensor
4 button controller keychain	Wireless white bulbs	Switch unit for shutters (contactless)	Wireless thermovalve
Wireless remote controller with display	Dimmer rof coloured (RGB) LED strips	Wireless switch unit 6 outputs	Wireless temperature sensor
