

Takes care of your home.

And you care about what you like.

Without
stress
worries
problems
big interventions

iNELS provides you a perfect overview of everything what happens in your house.

While your kids play in another room, you can easily check them on the TV screen – whether you work in the kitchen or relax.

Tip

The camera can control your home and surroundings; it keeps your life undisturbed, takes care of your relaxing and rest.

Intelligent lighting control

Home lighting can be adjusted according to the actual needs and situations.

iNELS can help you to get your kids to sleep, help you to ensure them a restful night's sleep. The lighting in the kids' bedroom can be gradually dimmed by iNELS. And if your kid wants to go to the bathroom at night, the lights recognize moving and automatically turn the light on 20 %.

Tip

Using dimmable LED lights saves you up to 40 % on energy costs.

It helps you to keep an eye on your kids.

It keeps the health...

It protects you from danger.

You go out and want to be sure that everything is turned off and nothing special happens at home. So then just push Exit button and switch off the circuit (excepting fridge). No curling iron or hair dryer are left running.

Exit
button!

of your loved ones in a good condition

It takes care of your family.

Are you worried about the health of your children, mum or partner? You don't need to be worried about if you have INELS. If something happens to your relatives, INELS will let you know immediately!

Tip

And more...

Bright solution of problems

If you do something regularly, simply set them. All will be working then automatically. The lightings, the heating or door controlling.

Be a housefather / housemother

iNELS electro-installation can be easily controlled. Be the one who has the household under thumb.

Control your family budget

iNELS can solve your problem and is available to everyone. We will be happy to advise you what your house needs.

With iNELS BUS System you can easily integrate most technologies in the house. Choose the right regulation to save energy. You don't need to worry about seasons – winter or summer. You easily adjust the room temperature and your house already knows what should be done.

Savings go along with the idea of smart housing.

The house can turn off the lights and the heating in the room when you are not at home. In winter it can roll up the blinds (allows the sun to naturally heat your home) and vice versa in summer it can roll down the blinds and protects you from sun and saving your air-conditioning.

Protecting your home and family. Flood, temperature and fire detector or gas leak detector send a command to turn off the water supply or main gas supply, switch on your air-conditioner etc. The function of presence simulation when you are on holiday is also really helpful.

You can use wall switch, glass touch switch, touch display, smartphone, tablet, laptop or television screen for controlling your electro-installation. This enables you to control your house from one place.

Do you like listening music, watching movies or pictures?

You will have access to all these data from anywhere in your house if you have iMIM system upgrade. Moreover, you can switch off TV in kids' room and control entire house via TV screen.
